

LegalEase: AI-Powered Legal Document Generator

Solution Requirements (Functional & Non-functional)

Project Phase	2. Requirement Analysis
Team	Team 3
Date	02 October 2026
Prepared From	Supplied LegalEase repository + supplied project templates

Functional requirements

FR	Epic	Current requirement
FR-1	Document type selection	Select NDA, Employment Contract, Lease Agreement, Service Agreement, Partnership Agreement or Other.
FR-2	Input collection	Collect parties, terms and dates.
FR-3	AI generation	POST /generate invokes GeminiDocumentGenerator and returns document text.
FR-4	Document preview	Render generated content in Streamlit.
FR-5	DOCX export	Generate downloadable DOCX.
FR-6	PDF export	Generate downloadable PDF.
FR-7	Validation	Reject empty required fields.
FR-8	Error handling	Show connection/generation errors.

Non-functional requirements

NFR	Requirement	Implementation / status
NFR-1	Usability	Centered form, clear labels, preview and downloads.
NFR-2	Security	Environment-based API key.
NFR-3	Reliability	Retry logic and controlled HTTP 502 errors.
NFR-4	Performance	90-second request timeout; production latency not established.
NFR-5	Availability	Local run support; production HA not implemented.
NFR-6	Scalability	Separated UI/API architecture supports later independent deployment.

Source basis: Implemented claims are based on the supplied LegalEase repository. Items without repository evidence are explicitly marked pending, future, or not implemented.
