

LegalEase: AI-Powered Legal Document Generator

Data Collection & Preparation

Project Phase	5. Project Development
Team	Team 3
Date	02 October 2026
Prepared From	Supplied LegalEase repository + supplied project templates

Data source identification

Data element	Source	Handling
Document type	User selection	Mapped to supported choices; Other permits custom type.
Parties	User input	Passed as prompt input.
Terms	User input	Passed to generator; semicolon-separated terms can be summarized by formatter.
Dates	User input	Passed to generation prompt.
Model output	Gemini API	Returned as text and rendered locally.

Preparation and validation

API validation rejects empty required fields. The Gemini prompt asks for plain text, numbered sections and legal-style headings. The formatter normalizes typography and removes stray Markdown.

Privacy & ethics

Users should avoid unnecessary sensitive personal information. The repository has no persistent database. Generated legal text should be reviewed before real-world reliance.

Source basis: Implemented claims are based on the supplied LegalEase repository. Items without repository evidence are explicitly marked pending, future, or not implemented.
