

LegalEase: AI-Powered Legal Document Generator

Prompt Engineering & Experimentation

Project Phase	5. Project Development
Team	Team 3
Date	02 October 2026
Prepared From	Supplied LegalEase repository + supplied project templates

Prompt structure

Component	Current implementation
Role	Professional legal drafting assistant
Task	Draft a complete legal document of the selected type
Inputs	Parties, terms and dates
Output	Plain text; no Markdown symbols
Structure	Numbered sections with ALL-CAPS headings
Minimum sections	Parties, Effective Date, Terms, Governing Law, Severability, Entire Agreement, Signature block
Specialized guidance	Extra guidance for NDA, employment contract and lease

Experimentation plan

For each document type, test completeness, fidelity to user facts, avoidance of invented facts, clause structure, formatting and edge cases. The supplied repository has functional tests but no automated semantic quality score.

Safety / bias handling

Generated text should be treated as a draft. Stronger legal-domain validation, jurisdiction controls and professional review remain future work.

Source basis: Implemented claims are based on the supplied LegalEase repository. Items without repository evidence are explicitly marked pending, future, or not implemented.
