

LegalEase: AI-Powered Legal Document Generator

Functional & Performance Testing

Project Phase	6. Project Performance Testing
Team	Team 3
Date	02 October 2026
Prepared From	Supplied LegalEase repository + supplied project templates

Functional test cases

ID	Scenario	Expected result	Status
FT-01	Empty input validation	HTTP 400 identifies empty fields	Automated — Pass
FT-02	Successful generation path	HTTP 200 returns document text	Automated mock — Pass
FT-03	Gemini failure handling	HTTP 502 returned	Automated — Pass
FT-04	Text sanitization	Markdown/typography normalized	Automated — Pass
FT-05	DOCX generation	Valid DOCX bytes	Automated — Pass
FT-06	PDF generation	Valid PDF bytes	Automated — Pass
FT-07	Root endpoint	Welcome JSON returned	Automated — Pass

Performance test cases

ID	Scenario	Measurement	Status
PT-01	API generation latency	End-to-end Gemini request latency	Not benchmarked
PT-02	Repeated generation	Latency/error rate over repeated calls	Not benchmarked
PT-03	Export latency	DOCX/PDF generation time	Not benchmarked
PT-04	Long content	Graceful handling of long inputs/outputs	Manual benchmark pending

Important distinction

Functional results are based on the supplied automated suite. No unsupported numeric performance claims are introduced.

Source basis: Implemented claims are based on the supplied LegalEase repository. Items without repository evidence are explicitly marked pending, future, or not implemented.
