

LegalEase: AI-Powered Legal Document Generator

Scalability & Future Plan

Project Phase	8. Project Demonstration
Team	Team 3
Date	02 October 2026
Prepared From	Supplied LegalEase repository + supplied project templates

Area	Current state	Future enhancement
Compute	FastAPI + Streamlit local architecture	Containerize and deploy independently
AI	Configurable Gemini model	Model abstraction, quotas, fallbacks and evaluation harness
Persistence	No database	Secure document metadata/history store
Security	Environment API key	Authentication, authorization, audit logs, secret manager
Performance	Basic timeout/retry	Metrics, tracing, load testing
Legal quality	Prompt-level structure	Jurisdiction-aware validation and professional review
Availability	No HA configuration	Managed deployment, health checks, autoscaling
Governance	No formal audit workflow	Versioned prompts, model records, retention and review trail

Roadmap

Phase 1: harden UX/validation → Phase 2: persistence/authentication → Phase 3: evaluation/legal controls → Phase 4: production deployment/observability → Phase 5: integrations.

Source basis: Implemented claims are based on the supplied LegalEase repository. Items without repository evidence are explicitly marked pending, future, or not implemented.
